**ZYM PORTABLE
ELECTROLYTE DRINK**
\$23.50 (30 tablets)/£5.50
(10 tablets)

We've all seen those pics of domestiques riding from the team cars back up to the peloton with a stack of bottles wedged under their jerseys for distribution to thirsty team-mates. Well, this small tube that slips easily into a jersey pocket is effectively the same thing. Drop one of the 10 fast-dissolving tablets contained in each ZYM tube into 500ml of water and a few seconds later you've got a drink that replaces lots of the essentials your body sweats out, including sodium, potassium and magnesium. Just the thing for a long ride on a hot day, and all we would add is a piece of cotton wool in the tube to stop the tablets bouncing around as you get through them. Brilliantly simple!
